

LSP Association 2022 Board of Director Elections Candidate Statement

**Katherine (Kate) Dilawari, P.E., LSP
Principal
Haley & Aldrich, Inc.**

I am a Principal at Haley & Aldrich, Inc., where I have worked for 22 years. I hold a B.S. and M.S. in Civil/Environmental Engineering from Tufts University and was licensed as a Professional Engineer (P.E.) in the state of Massachusetts in 2005, and as a Licensed Site Professional (LSP) in 2015.

With a background in both geotechnical and environmental engineering, I have focused my career on supporting brownfield redevelopment projects. I have diverse experience in environmental due diligence for property acquisition and financing, regulatory compliance work under the Massachusetts Contingency Plan (MCP), Resource Conservation and Recovery Act (RCRA) and Toxic Substances Control Act (TSCA), environmental regulatory compliance strategy development, site characterization, selection and implementation of remediation programs, consultation on design and construction of buildings on brownfield sites, and Brownfield Tax Credits. I have developed unique experience conducting response actions on many properties with asbestos in soil. I have also provided project management and engineering services for large construction projects including foundation design and installation, deep excavation support, instrumentation monitoring programs, excavated soil management, and construction dewatering. I am passionate about beneficial rehabilitation of former industrial properties, and I love seeing the end result of beautiful new neighborhoods in the greater Boston area that I have had a small contribution in creating.

I joined the LSPA Regulations Committee in 2018 and served as the committee co-chair from 2019 to 2021. In my service to the LSPA, I have planned and moderated several LSPA monthly meetings, have testified before MassDEP on the topic of asbestos in soil and soil disposal capacity shortages, and have collaborated with other members to provide public comments on a variety of MassDEP draft regulations and policies. I look forward to continuing as an active member of the LSPA and ask your consideration to continue these efforts on the LSPA Board of Directors.

LSP Association 2022 Board of Director Elections Candidate Statement

**Timothy F. Nevins, LSP
Senior Principal Scientist
Alliance Environmental Group/An F.W. Webb
Company**

Hello! For those LSPA members who don't know me, I am a Senior Principal Scientist for Alliance Environmental Group/An F.W. Webb Company, and I have been nominated to serve on the LSPA Board of Directors.

I have been employed as an environmental consultant in New England since 1996 and passed the LSP exam in 2013. I have been a member of the LSPA Education Committee (EC) since 2016 and have served as the EC Co-Chair since 2018. I have enjoyed working with the dedicated members of the EC to provide continuing education content to the LSPA members, and now I'm looking to expand my role in the LSPA by serving on the Board.

Serving on the EC has made me realize how much the LSPA relies on its members (and staff) to fulfil the day-to-day obligations. We are truly the straw that stirs the drink! Moving forward, I encourage all members to take a more active role in the LSPA. After all, it's OUR organization!

LSP Association 2022 Board of Director Elections Candidate Statement

**Joseph Roman, LSP
Environmental Division Manager
GEI Consultants, Inc.**

I am the Environmental Division Manager for the GEI Consultants, Inc. Boston branch, and have been practicing environmental consulting for 18 years. Prior to environmental consulting, I worked at the Harvard School of Public Health performing indoor and outdoor air quality studies. My professional experience and education have allowed me to incorporate a strong human health risk component in my approach to contaminated site cleanup.

I started participating in the LSPA Regulations Committee in 2012 and served as Co-Chair from 2017 to 2019. During that time, I helped the LSPA comment on proposed MCP changes, numerous guidance documents, and more focused regulatory and technical issues. I am currently on the LSPA Board of Directors and serve as Treasurer for the LSPA. My time on the Regulations Committee and LSPA Board has given me great exposure to MassDEP and allowed me to develop collaborative relationships with several Department staff.

I've enjoyed my involvement with the Regulations Committee and the LSPA Board and appreciate the exposure it has given me to the operation of the LSPA. My participation on the LSPA Board over the past few years has given me a good sense of the effort it takes to run the LSPA, and I look forward to contributing during an additional 3-year term. I particularly enjoy working with my peers throughout the industry towards a common objective; I think I have the respect, patience, and initiative it takes to continue to serve as a solid Board member. I look forward to an opportunity to continue helping the Association serve its members through a position on the Board.
