MCP Guidance to Go: What You Need to Know

Instructor Biography

Ian M. Phillips, LSP, Principal, Haley & Aldrich, Inc.

Ian has more than 35 years of experience providing strategic environmental consulting services including technical and regulatory direction related to the investigation, cleanup, and redevelopment of contaminated properties, litigation support for cost recovery actions, and regulatory compliance services under the Massachusetts Contingency Plan (MCP), the Massachusetts Solid Waste Regulations, RCRA, and Superfund. Ian has been a Licensed Site Professional (LSP) since the inception of the program in 1993 and has filed Permanent Solutions for more than 100 complex sites. The Permanent Solutions

have included disposal sites impacted by chlorinated volatile organic compounds in bedrock groundwater and indoor air, heavy metals in soil and sediments, Manufactured Gas Plant wastes, and LNAPL and DNAPL. As an expert in data quality, Ian helped the Massachusetts Department of Environmental Protection develop the Compendium of Analytical Methods and was the primary author of the Representativeness Evaluation and Data Usability Assessment (REDUA) guidance. His data quality and forensic chemistry expertise has been used in support of contaminant source identification, changed cleanup goals, cost recoveries/allocations, and criminal actions.
