HAZARDOUS WASTE SITE CLEANUP PROFESSIONALS**

3.09: Continuing Education Requirements

(2) Basic Requirements.

(a) Every three years following issuance of his or her license, each LSP shall demonstrate to the Board's satisfaction that he or she has earned a minimum of 48 continuing education credits. These credits can be earned only by attending Board-approved courses, conferences, or conference workshops. No person may apply continuing education credits earned during one license period toward another license period. However, applicants who have been approved to take the examination may take Board-approved courses and utilize the credits earned at their first license renewal. Subject to the attendance and other requirements set forth in 309 CMR 3.09, continuing education credits are considered to be earned at the completion of each Board-approved course or at the end of each Board-approved conference or conference workshop.

(b) All continuing education credits submitted by an LSP in fulfillment of the requirements of 309 CMR 3.09(2)(a) shall be earned by attending Board-approved courses, conferences, or conference workshops that are reasonably likely to maintain or enhance that LSP's ability to render competent professional services.

(c) An LSP may not repeat a course or conference workshop for credit during the same three-year license renewal period or during the following three-year license renewal period.
