

### About the Position

Omni Environmental Group, located in Harvard, Massachusetts, is seeking an Environmental Project Manager with 1 to 4 years of experience managing environmental assessment, remediation and construction projects and 5 to 15 years total experience in the environmental consulting industry. The candidate will be managing:

- Oil and/or hazardous material release projects under the Massachusetts Contingency Plan (MCP) including reporting, emergency response, comprehensive response actions, and risk characterizations;
- Remedial system design and installation;
- Vapor intrusion assessment and mitigation;
- Brownfields redevelopment; and
- Real estate due diligence projects.

This position is primarily an office position but will require some field work to support due diligence, assessment and remedial projects.

If you have the essential expertise, skill and passion necessary to succeed in this position, please submit your resume/qualifications to Omni Environmental Group at [Info@OmniEG.com](mailto:Info@OmniEG.com).

### Key Responsibilities

- Competent management of resources, schedules, budgets and project goals for multiple assignments;
- Prepare technical and cost-related proposals;
- Exercise autonomous and sound professional judgment without significant peer review;
- Provide technical and professional direction to junior staff;
- Prepare technical reports, plans and documents;
- Conduct field work including sampling, contractor oversight and meetings, including potential for occasional off-hours work;
- Coordinate and communicate project activities with staff, contractors, subcontractors, regulators, and clients;
- Travel to project sites for field work and meetings, including potential for occasional off-hours work; and
- Collaborate with senior-level personnel on projects and new business opportunities.

### Required Qualifications for the Position

- Bachelor's Degree or Master's Degree in geology, environmental science, engineering or a related environmental discipline;

- Minimum of one year of project management of MCP-related assessment and remediation projects;
- Proven experience implementing remediation projects (including but not limited to: structural excavation programs, emergency response, in-situ/ex-situ remedial strategies and waste management);
- A strong knowledge of the MCP;
- Knowledge of environmental regulations, policy and guidance (state and federal);
- Strong organizational, technical, writing, communication and team-building skills;
- 40 Hour HAZWOPER training and annual refresher courses, as required; and
- Provides satisfactory background check, possesses valid driver's license and insurable driving record.

*Desired Qualifications for the Position*

- Ability to pursue additional certification/registration in an environmental consulting related discipline;
- Ability to bring in new clients or business development opportunities; and
- Local candidates preferred.

Omni Environmental Group offer competitive salaries along with a complete benefits package including: medical coverage, disability insurance, 401K matching, reimbursement for continuing education, personal time, paid time off, training and skills development opportunities and performance-based bonuses.
