

Licensed Site Professional (1745)

Nobis Engineering, an employee-owned business, is seeking a Licensed Site Professional that desires join our team, will value our outstanding workplace culture, and desires an opportunity to become an employee-owner, deliver for our clients, and grow our company as one team. With a legacy of collaboration, responsiveness, and community involvement since 1988, Nobis Engineering offers a wide range of civil, environmental, and geotechnical engineering services. Our team of professionals strives to deliver creative and effective engineering and environmental solutions for our federal, state, municipal, transportation, and commercial/institutional clients.

We are seeking a self-motivated, highly qualified Massachusetts Licensed Site Professional (LSP) to serve in our Lowell, Massachusetts office as a technical professional and project manager on a wide variety of environmental assessment, investigation, design, and remediation projects. We're seeking an individual with recent and ongoing relevant MCP project experience and in-place MADEP relationships. The successful candidate will possess at least 12 years of relevant environmental industry experience with solid project management and client relationship skills. Experience in remedial design, development of remedial alternatives, and feasibility studies is considered a plus.

Capabilities & Requirements: Develop, coordinate, and manage site investigation and remediation projects of varying complexity; Prepare, review, and supervise the completion of cost proposals, technical scopes of work, technical and regulatory submittals, interpret investigation data, and evaluate site conditions relative to the MCP and other applicable State and federal regulatory requirements; Possess effective business development skills and effective client management traits; Strong verbal and written communication skills to prepare reports and other documents that demonstrate sound technical skills, judgment, and critical thinking capabilities; Possesses working knowledge of the MCP and key regulatory guidelines and regulations. Successfully prepare, manage, and track project budgets; Supervise, train, and mentor junior level technical staff; Solid knowledge of Microsoft Office. Ability to effectively collaborate with other members within the organization; Self-manage and self-motivate to handle multiple projects and tasks while producing quality results within the time constraints of each project; and Establish working relationships with industry peers, clients, and vendors while providing a high degree of mutual respect and integrity with each interaction.

Candidates for consideration should have at minimum a B.S. degree within an applicable engineering, environmental science, hydrogeology, or geology discipline and possess a current Massachusetts LSP license. Candidates with an M.S. degree in a technically applicable field or business-related field (i.e. - an MBA), affiliations and/or certifications with professional associations, and staff management experience are strongly encouraged to apply. Mandatory requirements include a valid driver's license and willingness to travel occasionally and the ability to bring new opportunities to the firm and expand our existing relationships.

Nobis offers a generous benefits package to eligible employees including: Medical/Dental, 401(k), Life/AD&D Insurance, LTD/STD Insurance, FSA, Educational Assistance, PTO and paid holidays.
