

Position: Project Manager / Senior Project Manager

We are looking to hire an energetic person to manage clients, projects, and subcontractors; and also to do some business development. The majority of our projects deal with various phases of the Massachusetts Contingency Plan (MCP), from assessment to cleanup. Therefore, experience with such projects and clients is necessary. Experience with the following is a plus:

- Preparation of Spill Prevention, Control and Countermeasure Plans
- Preparation of Storm Water Pollution Prevention Plans
- Hazard Communication Plans
- Underground Storage Tank Removal

Academic and Professional Qualifications / Work Experience:

- Bachelors or Masters degree in related science.
- Licensed Site Professional (LSP) and/or Professional Engineer (PE)
- At least 5-7 years in the environmental consulting industry

Salary: Negotiable
