

Environmental Project Manager / Licensed Site Professional

Prime Engineering is a multi-disciplinary firm providing civil and site engineering, land surveying and environmental consulting services for municipal, institutional, industrial, commercial and residential clients. We are looking for an experienced, highly technical Environmental Project Manager / Licensed Site Professional to join our team of professionals. Prime prides itself as having a diverse staff that enjoys working together as a team in a comfortable, professional setting.

Responsibilities:

- Provide technical oversight for a diverse portfolio of environmental projects to ensure they are managed within budget and on time.
- Ensure compliance with regulations and client requirements in the performance of project work.
- Design technical environmental solutions and manage their implementation.
- Interact with clients.
- Direct and mentor staff.
- Develop new business opportunities.

Qualifications:

- Bachelor's degree in Engineering, Geology, Hydrogeology, Environmental Science or related discipline.
- Strong MCP experience and understanding.
- Strong MCP report writing skill set.
- Licensed Site Professional (LSP) certification desirable.
- 8 years of experience performing and managing a variety of environmental consulting services.
