

Jr. Environmental Engineer – Site Remediation – Boston, MA 1800009C

Job Purpose: Support environmental remediation projects for commercial clients across the globe and have a hand in transforming tomorrow.

As an Engineer/Geologist, you will have the chance to support site characterization/remediation projects for industrial clients. During your time with us, you will have the opportunity to work with teams to help support office and field related tasks. Although there is a portion of this position that will work in the field, the majority of the time will be spent support teams through analyzing data; preparing remedial reports; and conducting studies, evaluations, and cost assessments. Additionally, as part of field teams, you'll have the ability to characterize soil, and perform routine sampling and testing in either a lead or support role and to oversee specialty subcontractors. During your time with us, you will also have the opportunity to work as a member of a project team to support technical reports for clients, state agencies, or other stakeholders; interact with internal team members in the local office, as well as regional and firm-wide staff; promote safety leadership and accountability and increase safety awareness to prevent employee and subcontractor injuries; and work with the senior project manager and health and safety managers to develop safety plans including coordination. If you're up for the challenge, we've been looking for someone just like you. Join our team and help us lay the foundation for human progress.

Basic Qualifications

- B.S. (degree completed at time of application) in geotechnical, civil, or environmental engineering OR geology related field.
- To be considered for this role, you must have a minimum of 2 years of environmental field experience including soil, groundwater, and soil vapor sampling experience.
- Experience leading field teams and overseeing subcontractors.
- Must be able to perform field work and obtain/maintain 40-hr HAZWOPER certification.
- Ability to demonstrate willingness and aptitude to lead and perform field work in varying weather conditions.
- Experience with MS Office applications.

Preferred Qualifications

- 3 to 5 years of environmental field experience including soil, groundwater, and soil vapor sampling experience.
- Massachusetts MCP experience.
- Possess strong writing, communication, and leadership skills.

- Exhibit integrity and the highest quality in all activities.
- Ability to learn quickly, analyze problems and assess alternative solutions, and organize multiple responsibilities with an emphasis on quality and reliability.
- 40-hr HAZWOPER certification.
