

Staff Scientist/Engineer

EndPoint, LLC (www.EndPointllc.com) is seeking a qualified environmental professional with 1 to 4 years of experience performing environmental field work, data reduction and interpretation, and some technical report writing. Basic knowledge of AutoCAD is desirable but not mandatory, and work with asbestos as either an Asbestos Project Monitor or Asbestos Inspector (or desire to pursue such asbestos professional certifications) will be a significant plus. This position will reside in the Londonderry, NH office, with the option to relocate to the Marlborough, MA office upon completion of adequate training.

Candidates should possess a minimum of a B.S. degree in a physical/natural science or engineering discipline, and current 40-hour HAZWOPER training.

If you are self-directed, with good oral and written communications skills, and are interested in a small-company culture with professional growth opportunities, please email resume and letter of interest to Gina Craven, Office Administrator at gcraven@endpointllc.com.
