

Mid-level Engineer

F.W. Webb Company – Warwick, RI

Alliance Environmental Group / An F.W. Webb Company, is seeking a mid-level Engineer with project management experience in the engineering consulting industry to support our Warwick, Rhode Island office. This is a position with great possibilities for growth in a company with a 150+ year history of commitment to their employees.

Position is full-time, permanent, with benefits and salary will be commensurate with experience. The position will involve projects in all areas of environmental and civil engineering. The ideal candidate should have knowledge of field methods and protocols as well as time management and technical skills. The position requires a well-organized candidate with strong verbal and written communication skills. Knowledge of federal and state environmental regulations is also required, as is the ability to effectively manage multiple tasks while maintaining a positive attitude. The qualified candidate will have the following roles and responsibilities:

- Provide support on projects related to land development, construction documents and administration, stormwater management, state and local environmental permits, utility and site design.
- Conduct ASTM Phase I and II due diligence investigations.
- Knowledge of associated environmental media sampling protocols.
- Provide subcontractor management and interface with clients and regulators.
- Prepare and/or support the development of regulatory documents, including technical reports, permit applications for stormwater and wastewater management activities, and discharge monitoring reports.
- Proficiency in AutoCAD and Civil 3D.
- Assist with project scoping/estimating and the preparation of cost proposals.
- Provide support to Professional Engineers and Licensed Site Professionals.
- Respond to Emergency Response calls as-needed.

In order to be successful in this role, qualified candidates should be able to:

- Self-manage/self-motivate to handle multiple competing projects while producing quality results within specific time constraints.
- Produce written reports and ancillary documents that display sound technical writing abilities. Capable of producing high-quality documents for our Client base.
- Establish working relationships with peers that includes a high degree of mutual respect and integrity.
- Collaborate with other members within the organization to develop scopes of work, written proposals, and final deliverables.
- A solid understanding of environmental and site development regulations.
- Be a strategic thinker and doer.

Candidates for consideration should have 4 to 10 years of environmental consulting experience and at minimum a B.S. degree within an environmental or civil engineering discipline. Affiliations and/or Certifications with professional associations and networking capabilities are also strongly desired and compensated at a higher level.
