

SENIOR ENGINEER / PROJECT MANAGER

Position Overview

This position requires a strong Project Manager skill base with an ability to provide technical direction on site remediation projects. The successful candidate will interact with clients and regulatory agencies and supervise technical staff performing environmental and engineering consulting services for a variety of clients including, but not limited to, Fortune 500 industrial clients, real estate developers, attorneys, petrochemical, and manufacturing companies.

Candidate Qualifications / Certifications

- Bachelor's degree in Environmental, Chemical, or Civil Engineering. Master's preferred.
- 10+ years environmental consulting experience.
- PE certification

Position Requirements

- Strong project management skills
 - Meet client budget and schedule needs.
 - Communicate with regulatory agencies.
 - Provide junior staff with training and mentoring opportunities.
 - Strong data evaluation and analytical skills.
 - Work with Principals and other senior professionals to scope, cost, plan and execute due diligence/preliminary assessment, regulatory compliance, multi-media site/remedial investigation and remediation projects (may include hydrogeologic assessments, chemical and hydrogeological data evaluation, data visualization, regulatory agency interactions and reporting).
- Strong written and verbal communications skills
 - Effective verbal communications at all levels required.
 - Must be a strong, independent writer.
- Relevant and Quality work experience
 - Capable of conducting complex technical work.
 - Able to provide support on complex projects involving commingled plume, fractured bedrock and chlorinated solvents.
- Regulatory agency experience
 - Thorough understanding of local regulatory requirements.
 - Experience producing client-ready deliverables with minimal supervision.
- Staff training and mentorship
 - Willingness and ability to train junior staff with respect to technical requirements, regulatory programs, writing skills, and verbal communications.
