

Subject: Environmental Project Manager and LSP-MA/LEP-CT (BIA000498)

Boston Environmental Colleagues – We are looking for an Environmental Project Manager and Licensed Site Professional (LSP) for Massachusetts or Licensed Environmental Professional (LEP) for Connecticut to help support and grow our work in the region! Requisition description below, referral bonus of \$1700 for candidates who join Jacobs! Interested candidates can apply [online](#).

Description:

As an Environmental Project Manager, you will have the opportunity to work on exciting and engaging large-scale site investigation and remediation projects associated with state-led and federal programs in addition to supporting environmental management issues associated with regional infrastructure projects. You will utilize your planning and communication expertise as well as your leadership experience to manage projects and lead a multi-discipline team or be a key team member as part of larger infrastructure projects in the region. You will also utilize your Licensed Site Professional (LSP) for Massachusetts or Licensed Environmental Professional (LEP) for Connecticut. As an Environmental Project Manager, you will spend a majority of your time in our Boston, Massachusetts office managing projects and mentoring junior members of your team. This position is a great opportunity for a candidate who is a self-starter and who is eager to grow in new and exciting ways at one of the world's largest consulting engineering firms.

Duties include:

- Lead and manage the project team through all phases of project planning, execution, and closeout, consistent with established project delivery processes to meet the scope, schedule, budget and other specified requirements stated in the contract.
- Manage multiple projects and teams in a dynamic environment to meet aggressive and competing schedule demands.
- Lead and support safety planning, chartering and implementation in the field. Be a strong advocate of Jacobs safety and quality culture.
- Coordinate the planning, staffing, scheduling, budget management, quality control, safety and organization of contractors, subcontractors and internal technical and support staff.
- Participate in project decisions regarding technical approaches, cost and scheduling performance.
- Identify schedule and cost variances and develop and implement recommendations for corrective action.
- Communicate and manage conflict with internal project teams, other contractors and client teams.
- Act as a prime contact with clients and be responsible for overall work progress, technical performance, and overall client satisfaction with projects.
- Actively seek and develop both follow-on and new work for clients served.
- Work with project delivery leadership and support team development through coaching and mentoring.
- Coordinate planning, permitting, design, field implementation, and reporting activities with staff, subcontractors, stakeholders, and clients.
- Support other Project Managers and Program Managers in all aspects of delivering technically challenging projects for major client accounts.

Qualifications:

- At least 10 years of experience with site investigation/remediation, and at least 3 years of directly related task/project management experience, with private, non-federal and municipal clients. Additional experience in federal projects will be considered.
- Bachelors or Advanced Degree in engineering, geology, hydrogeology, environmental science, or a closely-related field.
- Experience in managing environmental projects with a track record that includes planning, investigation, remediation and monitoring of impaired properties under state and federal programs.
- Practicing Massachusetts Licensed Site Professional (LSP) or Connecticut LEP.

In addition to the minimum qualifications, the preferred candidate will also have:

- Strong written and oral communication skills and a team-oriented attitude.
- Experience in remediation design and construction oversight.
- 10-20 years of environmental experience.
