

Clean Harbors, Inc. is North America's leading provider of environmental and hazardous waste management services. With an unmatched infrastructure of 48 waste management facilities, including nine landfills, five incineration locations and seven wastewater treatment centers, the Company provides essential services to more than 45,000 customers. Our customers are comprised of more than 175 *Fortune 500* companies, thousands of smaller private entities and numerous governmental agencies. Headquartered in Norwell, Massachusetts, Clean Harbors has more than 100 locations strategically positioned throughout North America in 36 U.S. states, six Canadian provinces, Mexico and Puerto Rico.

We offer competitive salaries and progressive benefits including health, dental, life insurance, 401K, paid time off, tuition reimbursement and more. We offer a drug free work environment and require a pre-employment drug screen. All applicants are subject to a pre-employment security background check, and a pre-employment physical fitness for duty medical examination.

**Project Scientist:**

The successful candidate will be self-motivated and hold health and safety as a paramount principle. They will need to be able to assess and re-evaluate Conceptual Site Models and project information; communicate with clients, property owners, and local and state officials; and be able to succinctly communicate site conditions and pertinent facts to the Licensed Site Professional (LSP). They will be responsible for proposing, overseeing and documenting response actions under the guidance of an LSP, which will include Immediate Response Actions, Release Abatement Measures and Phase I and II investigations at hazardous waste disposal sites. The selected candidate will be responsible for several projects at any given time and will be expected to manage a multitude of project aspects. The candidate will be responsible for: identifying, tracking, and meeting project deadlines and goals; preparation of scopes of work, cost estimates, and project schedules; and working with Clean Harbors Field Services to provide guidance as it pertains to regulations and deadlines. Responsibilities will also include working on internal Clean Harbors projects that could include limited and occasional travel. The position includes being part of the Clean Harbors LSP Emergency Response Team that requires an on-call rotation for one week at a time every four to six weeks, depending on staffing, to provide spill response oversight and environmental sampling.

A Bachelor's Degree in Environmental Science, Engineering, Geology or a related discipline, at least four years of experience with a working knowledge of the Massachusetts Contingency Plan (MCP; 310 CMR 40.0000) and environmental guidance policies, and strong writing and Microsoft Excel skills are required. This position has the potential to be staffed from Clean Harbors offices in Norwell, North Andover or Springfield, Massachusetts or Cranston, Rhode Island.

Interested candidates are encouraged to send their resume to [irwin.lisa@cleanharbors.com](mailto:irwin.lisa@cleanharbors.com) and please include "Interest in Project Scientist position" in the subject line or call 781-792-5821 to inquire.
