

Clean Harbors is seeking environmental personnel to join our Remedial Investigations team. Positions available include a **Field Inspector, Project Scientist, and Licensed Site Professional (LSP)**. These positions will grow our team to meet the increasing needs of our client base. Candidates must hold health and safety as a paramount principle. Written and verbal communications, attention to detail, ability to multi-task, and proficiency with technical report writing and use of MS Office software are required. Candidates will be responsible for several projects at any given time and will be expected to manage a multitude of project tasks. Candidates will be responsible for: identifying, tracking, and meeting project deadlines and goals; preparation of scopes of work, cost estimates, and project schedules; and working with Clean Harbors Field Services to provide guidance as it pertains to regulations and deadlines associated with oil and hazardous material. Positions include being part of the Clean Harbors LSP Emergency Response Team that requires an on-call rotation for one week at a time approximately every other month depending on staffing to provide spill response oversight, documentation, and environmental sampling.

The candidate shall hold a bachelor's degree in Environmental Science, Engineering, Geology or a related discipline and have experience with a working knowledge of the Massachusetts Contingency Plan (MCP; 310 CMR 40.0000) and be well-versed in environmental guidance policies. Positions have the potential to be staffed from Clean Harbors offices in Norwell, North Andover, or Springfield, Massachusetts or Cranston, Rhode Island. Working remotely may also be discussed with qualified candidates.

- **Field Inspector:** Applicant will provide field and office support in relation to MCP projects and assist the group as needed. Applicant will need to be organized, conscientious, have good attention to detail, work safely, and be motivated to learn and refine skills. Applicant will be expected to make pertinent site observations, complete accurate and scaled field sketches, photo-document sites, read and understand site maps, clearly document field activity and observations and keep accurate and thorough logs and files. Applicant must be able to identify potential problems, communicate those to the project team and/or reach out to senior level staff for guidance when needed. Projects may require extended work days and/or work in any type of weather. A basic understanding of soil science and classification is favorable. Applicant will also be writing technical reports and letters, and tabularizing data.
- **Project Scientist:** Applicant will need to be able to assess and re-evaluate Conceptual Site Models and project information; communicate with clients, property owners, and local and state officials; and be able to succinctly communicate site conditions and pertinent facts to the LSP. Applicant will be responsible for proposing, overseeing and documenting response actions under the guidance of an LSP, which will include Immediate Response Actions, Release Abatement Measures, and Phase I and II investigations at hazardous waste disposal sites.
- **Licensed Site Professional:** Applicant must have a strong understanding of the MCP and relevant guidance policies and be aware of potential changes to regulations/guidance policies; advance projects in all phases of the MCP; be able to complete and/or oversee a variety of site assessments, sampling techniques, and remediation technologies; and be able to review and analyze site data. The LSP will need to manage and mentor junior level staff, maintain and develop client relations, and seek new business development opportunities.

Clean Harbors, Inc. is North America's leading provider of environmental and hazardous waste management services. With an unmatched infrastructure of 48 waste management facilities, including nine landfills, five incineration locations and seven wastewater treatment centers, the Company provides essential services to more than 45,000 customers. Our customers are comprised of more than 175 *Fortune 500* companies, thousands of smaller private entities and numerous governmental agencies. Headquartered in Norwell, Massachusetts, Clean Harbors has more than 100 locations strategically positioned throughout North America in 36 U.S. states, six Canadian provinces, Mexico, and Puerto Rico.

We offer competitive salaries and progressive benefits including health, dental, life insurance, 401K, paid time off, tuition reimbursement, and more. We offer a drug free work environment and require a pre-employment drug screen. All applicants are subject to a pre-employment security background check, and a pre-employment physical fitness for duty medical examination.

Interested candidates are encouraged to send their resume to Irwin.Lisa@cleanharbors.com and please include "Remedial Investigations position" in the subject line or call 781-792-5821 to inquire.
