

Positions Available: Field Inspector, Project Scientist, Licensed Site Professional (LSP)

Locations: Norwell, North Andover, Springfield, MA, or Cranston, RI (Remote work options available for qualified candidates)

Clean Harbors is expanding our **Remedial Investigations** team and seeking qualified environmental professionals to join us and help support the growing demands of our clients. We prioritize safety in all aspects of our work and are looking for candidates who share this commitment.

General Requirements:

- Bachelor's degree in Environmental Science, Engineering, Geology, or a related field
- Working knowledge of the **Massachusetts Contingency Plan** (MCP; 310 CMR 40.0000)
- Familiarity with environmental regulations and best practices
- Experience in environmental site assessments, investigations, and technical reporting

Required Skills:

- Strong written and verbal communication skills
- Attention to detail and ability to manage multiple tasks simultaneously
- Experience in technical report writing and proficiency with MS Office
- Ability to manage and track multiple projects, deadlines, and goals

Key Responsibilities:

- Prepare scopes of work, cost estimates, project schedules, and environmental documentation
- Provide technical guidance and ensure regulatory compliance related to oil and hazardous materials
- Collaborate with Clean Harbors Field Services teams
- Participate in the Clean Harbors **LSP Emergency Response Team**, including on-call rotations (typically one week every other month, depending on staffing), to oversee spill response, documentation, and environmental sampling

Available Positions:

Field Inspector

The Field Inspector will support MCP-related projects both in the field and office. Key responsibilities include:

- Conducting site observations and field sketches
- Documenting activities with detailed logs and reports
- Identifying potential site issues and consulting with senior staff when necessary
- Conducting soil classification (a plus)
- Preparing technical reports, letters, and data tables

Ideal candidates should be organized, detail-oriented, safety-conscious, and eager to learn. Extended workdays and outdoor work in various weather conditions may be required.

Project Scientist

The Project Scientist will play a key role in assessing Conceptual Site Models and communicating with clients, property owners, and officials. In addition to many Field Inspector responsibilities, additional responsibilities include:

- Managing Immediate Response Actions, Release Abatement Measures, and Phase I & II investigations under the guidance of the LSP
- Collaborating with LSPs to advance project goals
- Evaluating project data and ensuring proper documentation

Successful candidates will be confident in their communication skills and capable of working independently under LSP supervision.

Licensed Site Professional (LSP)

The LSP will manage project phases under the MCP and work with environmental guidance policies, with responsibilities such as:

- Overseeing site assessments, sampling, and remediation techniques
- Managing junior staff and mentoring team members
- Maintaining client relationships and seeking new business opportunities

Candidates must have a strong knowledge of the MCP and associated guidance, with the ability to adapt to regulatory changes.

Clean Harbors, Inc. is North America's leading provider of environmental and hazardous waste management services. With 48 waste management facilities, including landfills, incineration sites, and wastewater treatment centers, we serve over 45,000 customers—including Fortune 500 companies, government agencies, and private entities.

We offer competitive salaries and comprehensive benefits, including health, dental, life insurance, 401K, paid time off, tuition reimbursement, and more. Clean Harbors is a drug-free workplace. Pre-employment drug screening, background checks, and physical fitness evaluations are required.
