

## **Company**

Enstrat, Inc.

## **Job Overview**

We are an Environmental Consultant Company with headquarters in Warwick, Rhode Island, servicing the New England area. Seeking a knowledgeable and detail-oriented Licensed Site Professional to join our team. In this role, you will provide expert advice and support on a variety of environmental issues, ensuring compliance with environmental laws and regulations. You will work closely with clients across various sectors, including oil and gas, to develop sustainable solutions that minimize environmental impact. Your expertise in project management and environmental permitting will be crucial in guiding projects from inception through completion.

## **Responsibilities**

- Manage and/or direct MCP projects as LSP of Record.
- Lead environmental site assessments and remediation projects from inception to completion, ensuring compliance with regulatory requirements and corporate quality standards.
- Develop and oversee project scopes, schedules, and budgets to ensure timely and cost-effective delivery.
- Supervise and coordinate field activities, including sampling, data collection, and site monitoring.
- Prepare, review, and approve technical reports, remediation plans, and regulatory submissions.
- Provide expert guidance on environmental issues, site conditions, and regulatory compliance.
- Support business development by identifying new opportunities, assisting with proposals, and engaging in client outreach.
- Serve as the primary client contact, providing regular updates and addressing concerns proactively.
- Build and maintain strong client relationships, providing expert guidance on environmental compliance and technical solutions while supporting business development initiatives.

- Mentor and support junior staff, providing technical guidance and career development opportunities to ensure efficient execution and successful project outcomes.
- Collaborate with multidisciplinary teams to integrate expertise and achieve project objectives.
- Collaborate with technical staff and stakeholders to facilitate timely and effective project delivery.
- Engage in internal training and professional development to enhance skills and industry knowledge.
- Stay up to date with local, state, and federal environmental regulations and industry trends and ensure project adherence.

### **Skills & Abilities**

- Salary based on experience level
- Experience working on contaminated sites across Massachusetts, including direct interaction with MassDEP regulators.
- Similar experience in Rhode Island or other New England regulators is a plus.
- In-depth knowledge of site assessment, characterization, soil and groundwater management, data analysis, remediation techniques, and risk assessment.
- Proven ability to interpret regulatory requirements, make sound compliance decisions, and provide timely client guidance.
- Excellent verbal, written, and interpersonal communication skills.

### **Requirements**

- **Must have Licensed Site Professional (LSP) certification**
- Additional licenses or certifications are a plus.
- Expertise in environmental site assessment, remediation, and regulatory compliance.
- Demonstrated ability to produce high-quality work and meet deadlines.
- Strong communication, project management, and problem-solving skills.
- Ability to work both independently and collaboratively within a team.

- Proven track record of managing and maintaining strong client relationships.
- Business development experience or interest is a plus.

Join us in making a positive impact on the environment while advancing your career as an Environmental Consultant! Your expertise will play a vital role in shaping sustainable practices for our clients.
