Salary Range: \$95,000 to \$125,000

Office Site/Remote/Hybrid: Office

Who are We?

TechLaw Consultants, Inc. has been an environmental consulting firm since 1983, providing services to federal, state and commercial clients. We specialize in managing environmental risks, offering sustainable solutions, and responding to environmental disasters. Notable incidents we have handled include the Space Shuttle Columbia Explosion, Pacific Ocean typhoons, the East Palestine, OH, hazardous train derailment, California Wildfires and the 2023 Maui wildfires. Our team consists of scientists, engineers, and specialized personnel, delivering advanced, frontline environmental response and support. We are an employee-owned company, headquartered in Chantilly, VA, with a work environment that fosters and encourages employee growth and empowerment, promoting a culture of dedicated, creative, and dynamic individuals.

What do we offer YOU?

- Competitive compensation
- Employee recognition programs, including monetary rewards
- 17 days of Flexible Paid Time Off
- Employee Stock Ownership Plan (ESOP) options
- 401(k), with a generous employer match
- Health, dental, vision, employer-paid life insurance, short/long-term disability, Health Savings/Flexible Spending accounts and more
- A collaborative team environment, working with scientists and project managers who are experts in risk assessment, hydrogeology, geology, chemistry, soil science, sampling and analysis, hazardous waste investigations, remediation, and public outreach
- Entrepreneurial work opportunities

Who are YOU?

You are a scientific professional with a degree in environmental science, environmental engineering, geology, toxicology or a similar field. You have at least 3 years of project management experience and you are ready to provide technical and project management expertise and execution of environmental sampling programs, primarily in support of our environmental consulting work for the U.S. Environmental Protection Agency, Commonwealth of

Massachusetts, and other federal, state and local government agencies, as well as the private sector.

What does your day/week look like?

- Provide technical, budgetary, and resource management of multiple and concurrent projects and project teams
- Evaluate and prepare risk assessments, environmental investigation and remediation work plans, designs and reports
- Develop strategies for the remediation and closure of large CERCLA and RCRA sites
- Evaluate site documentation for compliance with federal, state and local standards
- Write reports for clients
- Oversee field investigations and remediation activities
- Occasional long days of field work, with the need to walk or hike through rough and uneven terrain, woodlands, thick vegetation, and on slopes, while carrying supplies

Qualifications

What do you need for this amazing opportunity?

- A bachelor's degree in environmental science, environmental engineering, geology, toxicology or a similar field is required. A master's degree and/or a professional registration, such as Professional Engineer, Professional Geologist, and/or Licensed Site Professional, is preferred, but not required
- A minimum of 7 years of experience in a variety of environmental investigation activities, such as sampling, assessments, and document review and preparation, preferably involving sites regulated under CERCLA, RCRA, the Massachusetts Contingency Plan (MCP), and/or other state voluntary cleanup programs.
- At least 3 years of experience in project management, including scheduling, budgeting, and resource management
- Experience with development and evaluation of risk assessments
- Familiarity with environmental compliance programs, including USTs, ASTs, NPDES, and DOT
- The ability to work independently and yet be team oriented, with excellent organizational, verbal and writing skills and the ability to handle multiple tasks and meet deadlines, with meticulous attention to detail
- Ability to lift up to 50 lbs., including loaded coolers and equipment
- Legal U.S. citizenship, with ability to obtain and maintain state and federal security clearances and pass background checks
- At least 21 years of age, with a valid driver's license, safe driving record and the ability to drive in company-provided vehicles
