

GC/MS Organics Chemist

EXTENSIVE BENEFITS – FELXIBLE SCHEDULE – COMPETITIVE WAGES

Serving clients all throughout the east coast, Phoenix Labs is a profitable, progressive, and rapidly-growing environmental laboratory dedicated to providing clients with quality service and swift turnaround times. We're seeking applicants who are looking to jump-start a long-lasting career in environmental sciences, in the hopes that together we can advance to even greater heights! We proudly commit to personally training and expanding our employees' knowledge base, so that they can achieve great success no matter their position, and always look to promote from within the company first.

We're in need of a full time Organics Chemist with great attention to detail, excellent organizational skills, multitasking experience, and proficiency in working with a team for a first-shift position. The hours are approximately 7:30AM-4PM Monday-Friday, with a 30 minute unpaid lunch; flexibility in hours is possible in keeping with first-shift parameters. Must be able to work overtime and weekends when necessary.

JOB DUTIES

On-the-job training will be provided.

The candidate must:

- Be familiar with their appropriate SOP and EPA methods.
- Be able to maintain analytical instrumentation to adhere to method protocol, including: troubleshooting and general maintenance to meet the requirements for initial calibrations, continuing calibrations, and adequate tuning capabilities.
- Ensure proper initial calibrations and continuing calibrations are met, log books are filled out accurately, and sample QC requirements have been met per the SOP and/or analytical methods.
- Be able to make standard solutions and run samples with appropriate dilutions to meet the customer's detection level requirements, and prepare the sample for any clean up procedures and/or required dilutions above calibration range.
- Be knowledgeable in the proper calculations for soil, sludge, aqueous and air samples to include all of the sample parameters, such as % solids, extraction weights/volumes, final extract volumes and dilutions.
- Demonstrate proficiency or capability in the following:
 - 8260 Volatiles,
 - 524 Volatiles,
 - and 624 Volatiles.

The organics chemist is responsible for informing upper management when any of the above responsibilities are not met, and for completing non-conformance reports when any problem causes a deviation from the procedure.

Applicant will be standing and sitting throughout the shift, while equipped in company-provided personal protective gear and working with a variety of chemicals and environmental samples, which may have strong odors and fumes. Must be able to lift up to 30lbs., some lifting and crouching may be required.
