

## **Senior Geologist/Environmental Scientist/Licensed Site Professional**

Mabbett & Associates, Inc. (Mabbett®), is seeking a self-motivated senior environmental professional to support the firm's site assessment and remediation projects, with an emphasis on assignments working under provisions of the Massachusetts Contingency Plan (MCP). As a member of the firm's Site Assessment and Remediation (SAR) Group, this position will serve the commercial, industrial, private and federal sectors from initial Phase I environmental site assessments through remedial investigations, feasibility studies, remediation system design, installation, system operation and long-term maintenance and monitoring support. This role will work with a wide variety of clients, from local manufacturers to complex high-visibility Brownfield redevelopment projects and Federal HTRW projects working under provisions of CERCLA and RCRA. This position will evolve into directorship of the SAR Group. A current Massachusetts Licensed Site Professional (LSP) license in good standing with a minimum of five years as a project LSP-of-Record is required.

### **Position Requirements/Qualifications**

- Bachelor's degree (or higher) in Geological Sciences, Environmental Sciences or Environmental Engineering;
- Minimum of 10 years of experience in site assessment and remediation working under the provisions of the MCP, other state regulatory programs, CERCLA and RCRA with experience managing HTRW type Federal projects;
- Massachusetts Licensed Site Professional (LSP) License Required;
- Minimum of 5 years of experience as LSP-of-Record in the Commonwealth of Massachusetts;
- Design and implementation of complex environmental site investigations, including experience across all environmental media involving innovative, direct sensing, and conventional investigation techniques;
- Remedial system design, monitoring, and operations experience;
- Excellent technical writing skills with demonstrated technical experience, including preparing site investigation reports, feasibility studies, cost estimates, remediation system designs, bidding documents and specifications;
- Excellent organizational and personal communication skills; ability to successfully interact with clients, staff and peers clearly and directly;
- Experience managing and mentoring a small group of technical staff;
- Mechanical aptitude;
- Proficiency in Microsoft Office® products: Word, Access, and Excel;
- OSHA 40-hour HAZWOPER and current 8-hour refresher certification;
- Red Cross First Aid, CPR, and AED Certified;
- Must possess or be able to obtain, as a minimum, OMB Position of Public Trust and Federal Protective Services Favorable designations (pass a federal background check). Other clearance requirements for access to federal facilities may be necessary and will be addressed on a case-by-case basis;
- Ability to travel, work in the field, work outdoors, and lift and carry items weighing up to 60 lbs.

### **Responsibilities**

This senior-level position will require technical, staff management, client maintenance, and new business development involvement with eventual SAR Group directorship responsibilities. Demonstrated experience in all aspects of site characterization, monitoring, remediation projects, project close and reporting across all environmental media required. Management of subcontractors, to include development of subcontractor agreements, monthly invoice and status report preparation, and client follow-up required. The candidate selected for this position will work closely with the firm's Vice President of Environment & Infrastructure to manage the SAR Group and develop a strategy for growth of the group practice over time. Preparation for and

involvement in monthly marketing meetings required as is staff mentoring and involvement in yearly staff performance evaluations.

#### **Base Location**

This position will be based in Bedford, Massachusetts. Work may also include specific project opportunities on a short-term basis throughout the US.

#### **About the Firm**
