

FY27 BOARD OF DIRECTORS CANDIDATE STATEMENT

KATHERINE "KATIE" KUDZMA, LSP
Director of Site Investigation & Remediation, VHB

Katie is seeking re-election to the Board for a second term (2026-2029). Her first year would be as Immediate Past President, as she currently serves as LSPA President.

Katie Kudzma, LSP, is the Director of Site Investigation & Remediation at VHB, an engineering, consulting and design firm headquartered in Watertown, MA. In this role, she manages the investigation and remediation of contaminated properties for state transportation agencies, private developers, and municipalities throughout New England. Katie has been a Licensed Site Professional (LSP) since 2019. She was elected to the LSPA Board of Directors in 2023, and currently serves as LSPA President (term ending June 2026). She also serves as co-chair of the LSPA Legislative Committee. Katie holds a bachelor's degree in Environmental Geosciences from Boston College and a master's degree in Environmental Management and Sustainability from Harvard University.

"I have greatly valued my first term on the LSPA Board of Directors, gaining deeper insight into the profession and the challenges facing our industry. It has been a privilege to serve alongside my peers. I am seeking re-election to a second term on the LSPA Board of Directors (the first year of which would be as Immediate Past President) so I can continue our work advancing LSPA programs that support emerging professionals and those who are working toward becoming LSPs."

FY27 BOARD OF DIRECTORS CANDIDATE STATEMENT

LARS ANDRESEN
Project Manager, Tighe & Bond

Lars is seeking re-election to the Board for a second term (2026-2029). He currently serves as the Clerk.

It has been a privilege to contribute to the LSPA's mission through Board service—currently serving as Clerk—along with committee involvement and ongoing industry engagement. I am excited to seek re-election to continue these efforts alongside my dedicated and passionate colleagues on the Board of Directors.

I bring over 18 years of experience in environmental site investigation and remediation, including MCP compliance, design-build support, and emergency response. My work on complex infrastructure and transportation projects has reinforced the importance of clear, practical regulations and strong advocacy—areas where the LSPA plays a critical role.

My involvement with the LSPA began more than a decade ago through the Emerging Professionals Committee, where I participated for five years, including two years as co-chair. That experience shaped my commitment to mentorship and workforce development—priorities that remain critical as our industry evolves and experienced professionals transition out. It is essential that we actively cultivate the next generation of environmental practitioners and LSPs.

I have consistently supported training and educational initiatives—both within my organizations and through professional associations—and remain committed to expanding these opportunities to ensure a strong future for both the industry and the LSPA. If re-elected, I will continue to support the LSPA's advocacy efforts, promote meaningful professional development opportunities, and help ensure the organization remains inclusive and valuable to members at all stages of their careers.

FY27 BOARD OF DIRECTORS CANDIDATE STATEMENT

AMY A. ROTH, LSP
Vice President, Wilcox & Barton

Amy is seeking re-election to the Board for a second term (2026-2029). She currently serves as LSPA Treasurer.

I am a Vice President for Wilcox & Barton, Inc., currently leading our Southeastern New England Environmental group. I have been on the LSPA Board for one term (2024-2026), serving as the Treasurer for the past two years. I have also been involved with the Technical Practices Committee for more than 10 years, acting as co-chair and leading work groups. I really enjoy working with my peers in the LSPA and appreciate the network of support and professional collaboration that the LSPA creates.

I hold a BS and an MS in Geology/Geochemistry from Washington University in St. Louis, so my environmental career started in Missouri, but I have been living and working in Massachusetts for 25 years. I have been an LSP since 2005 and a Professional Geologist in New Hampshire since 2002. I appreciate being able to work with a wide range of clients and concerns, from acute and personal releases of home heating oil to extensive and complex releases of solvents and other industrial chemicals. More recently, I have enjoyed working with municipalities struggling to respond to releases of PFAS impacting private and public drinking water wells. In my own community, I serve on the local Board of Health and volunteer in support of waste minimization (circular economy) activities.

I am seeking a second term on the LSPA Board of Directors to continue working with our strong Executive Director and Board members as Treasurer. It is a role that takes time to transition and learn, and I believe continuity will be beneficial as the LSPA evolves in response to changing educational requirements and technologies. I look forward to continuing to serve the membership through the Board and appreciate your consideration.

FY27 BOARD OF DIRECTORS CANDIDATE STATEMENT

MARIE RUDIMAN
**Senior Risk Assessor/Toxicologist,
EnviroRisk Solutions, LLC**

Marie is seeking election to the Board for a first term (2026-2029).

I have enjoyed being an associate member of the LSPA since 2019. I have been actively participating in the Technical Practices Committee (TPC) for the last six years (two as co-chair) and am currently serving as co-chair of the Risk Assessors (RA) Subcommittee.

Through my experience with the TPC, in my current service as co-chair of the RA Subcommittee, and in my current role as a senior risk assessor and toxicologist at my company, EnviroRisk Solutions, LLC, I've been a leader in working on various technical issues dealing with the MCP, risk assessment, and environmental practice. Through the LSPA, I've had the pleasure of helping prepare comments on new guidance, Q&As, and versions of the MCP; co-authored a White Paper on TCE; and participated in preparing utility worker evaluation guidance, PFAS Q&As, and more. I've also presented on behalf of the LSPA at numerous monthly meetings and will be presenting at the April 2026 Symposium, and I was honored to receive the LSPA Member of the Year award in 2024. If elected to the Board of Directors, I plan to continue this advocacy in technical practices and ensure the LSPA continues to work as a liaison between MassDEP and LSPs and other professionals working in the field.

With over 30 years in the consulting field, I have managed every aspect of a large variety of risk assessment projects. I have deeply appreciated the LSPA's advocacy for developing expert lead guidance on topics such as evaluation of PFAS sites, asbestos, climate change initiatives, as well as the understanding intricacies of the MCP and various issues that come up in the practice. I would be honored to be a part of such an important organization.

I want to thank the LSPA Nominations and Elections Committee for this opportunity to join the Board of Directors. If elected, I look forward to working with the dedicated group of professionals by adding my voice to advocacy efforts and lending my expertise on technical issues.
