

Association
assess. advise. restore.

Lee Penwell, LSP

Lee Penwell, LSP, is a Licensed Site Professional in Massachusetts and a Senior Project Manager at Haley & Aldrich, Inc. She has experience with a wide variety of site remediation and brownfield redevelopment projects. Ms. Penwell works for private developers, as well as public and private institutions, on projects that involve environmental regulatory compliance and site remediation integrated alongside geotechnical building design. Her projects include numerous urban and suburban sites, including current and former industrial properties, manufacturing facilities, and commercial properties.

Lindsey Tirrell, PE

Lindsey Tirrell, PE, is a Professional Engineer in New Hampshire and a Project Manager at Haley & Aldrich, Inc. with over 10 years of experience. She brings hands-on experience from her years in the field to project management with a focus on site assessment, real estate due diligence, redevelopment of brownfields sites, environmental compliance under state and federal regulations, remediation of contaminated sites, and soil and groundwater management during construction.

Ms. Penwell and Ms. Tirrell will present on site characterization for soil management at the December Membership Meeting on December 15, 2026, via Zoom webinar.
