Anne Marie C. Desmarais is a Lecturer in the Civil and Environmental Engineering Department at Tufts University in Medford, MA. She teaches courses in Risk Assessment, Toxicology, Hazardous Materials Management, and Probability and Statistics as well as an undergraduate survey course on Environment and Technology. She advises graduate students in the Environmental Health MS program.

She is also owner and principal of ***ENVIRONMENTAL INSIGHT***, through which she provides consulting services in environmental health, human health risk assessment, environmental risk management, and hazardous waste management strategies. Ms. Desmarais provides services to municipalities and citizen groups as a third-party reviewer of risk assessments, Phase II studies, and remedial action plans.

Ms. Desmarais founded ***ENVIRONMENTAL INSIGHT*** in 1991, and operates the business on a part-time basis. Ms. Desmarais taught at Tufts from 1983 to 1991 as a visiting lecturer and has been employed under a faculty contract since September 1991.

Ms. Desmarais has extensive experience with MCP projects, including Risk Assessment and support of Phase II Comprehensive Site Characterizations, particularly development and review of sampling and analysis plans and peer review of technical documents. Ms. Desmarais has worked for several Massachusetts community groups as a Technical Advisor for MCP oversight.
