Bioremediation: Basics, Innovations, and Applications

Live Webinar via Zoom on March 4, 2025 from 10 AM – 2 PM

INSTRUCTOR BIOGRAPHIES

Jack Sheldon of [Environmental Consulting Firm | Antea Group USA | Antea Group](#), has over 40 years of experience as a project manager and technical program director. He specializes in the field application of various types of bioremediation and numerous other remediation technologies. He has completed remediation projects in all 50 states and more than two dozen countries. Jack co-authored one of the first field application books on bioremediation. He holds an MS in Environmental Microbiology and a BS in Bacteriology and Public Health from Wagner College, State Island, NY.

Eric Bueltel, Technical Director at [ETEC, Inc. - Advanced bioremediation solutions](#), holds undergraduate degrees in Biology and Chemistry, complemented by a master's degree in environmental engineering. Over the span of two decades, he has devoted his skills to ETEC, successfully applying a broad range of techniques including bioremediation, chemical oxidation, and surfactant-flushing technologies, in various subsurface environments. He specializes in employing groundwater recirculation to facilitate oxidative bioremediation using oxygen and nitrate, as well as implementing reductive bioremediation with soluble substrates.
